SUMMARY:

Bookabi lets children of all ages write illustrated stories. It comes with plenty of 2D and 3D characters, objects and backgrounds.

ADDITIONAL SUPPORT RESOURCES:

- [Bookabi Website](#)
- [Bookabi Video Tutorial](#)
- [List.ly list of Bookabi Resources](#)
- [Step Sheets/Handout](#): See Pages 2-3.
- Complete Library of App Integration Snapshots

Bookabi includes...

- 1 2D and 3D characters that you can pose, rotate and move
- 2 Easy-to-add text, speech bubbles, new pages and more
- 3 Pre-loaded backgrounds, objects and stickers
- 4 In-App store with additional content

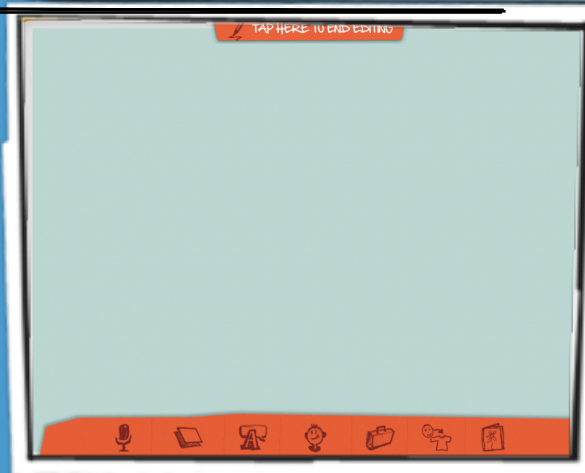

1. Open the app and tap on the add icon to create a new story. On the menu page, you can also browse through the created books and export the books by tapping the share button.

2. Add a story title and author name to your book. Then choose your desired orientation and tap the create button.

3. The app will create the first page of your book. The bottom menu provides all the elements you can add to your story. The top button will take you in and out of the edit mode.

4. Tap on the background button to add illustrations or images from the photo gallery.

6. Tap on text button to add text to your story. You will first select if the type will have a background and/or border. Then you can add text, change the font, change the color, and more. When you are done editing the text, tap somewhere else on the page to return to the main edit menu.

7. A voice narration can be added by tapping the microphone icon.

8. On the main menu, tap on the share button to export your book. Saving it to iTunes will allow you to download a pdf version of the book when you connect your device to a desktop with iTunes.
